

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

July 8, 2009

Mr. Henry B. Barron
President, CEO, and Chief Nuclear Officer
Constellation Energy Nuclear Group, LLC
100 Constellation Way, Suite 200C
Baltimore, MD 21202

SUBJECT: CALVERT CLIFFS NUCLEAR POWER PLANT, UNIT NO. 1; NINE MILE POINT NUCLEAR STATION, UNIT NOS. 1 AND 2; R.E. GINNA NUCLEAR POWER PLANT - SUMMARY OF JUNE 29, 2009, CONFERENCE CALL WITH CONSTELLATION ENERGY NUCLEAR GROUP, LLC (CENG), ON DECOMMISSION FUNDING ASSURANCE (TAC NOS. ME0499, ME0540, ME0541, AND ME0522)

Dear Mr. Barron:

On June 29, 2009, the Nuclear Regulatory Commission (NRC) staff held a conference call with representatives of Calvert Cliffs Nuclear Power Plant, Inc., Nine Mile Point Nuclear Station, LLC, and R.E. Ginna Nuclear Power Plant, LLC, (the subsidiary licensees of CENG, or the licensee). The purpose of the call was to clarify the amount of the decommissioning funding assurance shortfall calculated by the NRC staff for the subject units, to clarify the methodology used by the NRC staff to determine decommissioning funding assurance levels, and to establish a schedule for the submittal of a plan to address the shortfall. A list of attendees is provided as Enclosure 1.

For each of the subject units, the NRC staff described its calculation of the minimum amount of financial assurance required by Title 10 of the *Code of Federal Regulations* (10 CFR), Sections 50.75(c)(1) and (2). The NRC staff identified the amount credited to the licensee's decommissioning funding assurance total due to contributions, if any, and earnings on its decommissioning trust fund balance. The difference between the minimum required amount and the total amount of decommissioning funding assurance provided, including earnings and contributions, as of December 31, 2008, was identified as a potential shortfall if no adjustments are made by the licensee.

For each unit, the licensee agreed that the amounts described by the NRC staff reflect the licensee's decommissioning funding assurance status as of December 31, 2008.

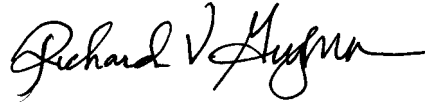

The licensee agreed to submit its plan on or before July 30, 2009, in accordance with the provisions of 10 CFR 50.4. The licensee agreed that its plan will contain sufficient detailed numerical information to permit the staff to evaluate its plan. The submittal will include the final agreed-upon values for the required minimum amount, projected total amount of decommissioning funding assurance, and the potential shortfall as of December 31, 2008. The NRC staff agreed that (1) the plan could use the actual date of license expiration as the end date for the earnings credit allowed during operation, and (2) realized earnings to date on trust fund balances could be credited to the total amount of decommissioning funding assurance proposed in the plan.

H. Barron
